

BRONCOS

Hello Families!

Busy Fun

With the end of the school year approaching, I just want to say that the Broncos class has come a long way since its start last summer. It is truly an honor to watch these amazing children grow in just one year into such inquisitive children and to be able to work in their preparation for kindergarten. I would like to thank all the families for all the work they have put into making sure this has been their best year yet.

Graduation month has finally arrived, and we are excited to show you what your children have worked so hard to showcase for you on this momentous day. We have an event planned to celebrate our hard working Broncos in the weeks following our Pre-K Graduation. We will have a class trip to the San Antonio Zoo and have an End-of-the-year celebration. It is with mixed joy and sadness as our 2025-2026 Broncos leave us for kindergarten, but we know that they will do great. The Broncos teachers will be looking forward to welcoming a new group of Broncos, the class of 2026-2027. We are excited to meet and get to know these new students and their families. Once they are settled in and get to know each other, we will begin working towards understanding classroom rules and routines. Throughout the year, we will also work on social skills, manners, problem solving and learning to work both independently and in groups.

Broncos will be starting the Big Day Scholastic Pre-K curriculum at the beginning of the school

year. We don't take summers off from school; learning must be a part of everyday life! This summer will grab our backpacks and maps and become explorers! Our lesson plans will take us through many different adventures starting with exploring different types of animals from the jungle to under the sea. A fun activity we will do is the saltwater experiment. We will add some salt and water, baking soda with water and regular water to cups. We will then see which cup small objects sink or float. The children will learn that salt water is more dense than normal water, so things float in salt water.

Another fun summer activity is to go camping, so we will have a "camp-out" in the classroom and eat s'mores. As we learn all about camping and camping safety, we will go on a scavenger hunt and use our binoculars we made out of toilet paper rolls and look up at the stars. Looking up at the stars will then lead us to my favorite adventure of all, our planets! We will not only learn about the different planets that make up our solar system, but we will also work together as a class to make our own solar system display. One of the fun activities we'll do is make our own moon rocks. It is very hands-on, and the children will practice fine motor skills by rolling the materials into a ball and then using a dropper to drop vinegar onto their moon rock creating craters. Once we roll into August, children will get into gear and begin our journey into the school year, where we will then start our fall curriculum which will include STEAM activities and kindergarten practices.

REMINDERS: Families, please don't forget we live in the greatest state of Texas, and the sun will be shining well into the school year. Please allow extra time to pack a water bottle with only water inside everyday and to apply sunscreen each morning at home before school. We play outside twice a day, so please bring a bottle of sunscreen to keep in the classroom (NO AEROSOL ALLOWED). Make sure your child's personal belongings are labelled with his/her first name and first letter of their last name. If you have any questions, comments or concerns, please feel free to contact me. I look forward to the upcoming months.
